

PRESCHOOL FOR ALL NEWSLETTER

FEBRUARY 2020

We survived the long month of January! February is a welcome sight and appears to be bringing some much needed sunshine! Only 45 days until Spring!

We will begin working on our Tubes and Tunnels study this month. We will explore what we already know about tubes and tunnels and we will ask the questions "What are the characteristics of tubes and tunnels?" and "Where can we find tubes and tunnels?" We will provide some examples of tubes and tunnels in the classroom for the students to investigate over the course of the study. We always welcome donations! If you have any tubes/tunnels at your house that you would be willing to donate, we will happily accept them. Examples include toilet paper and paper towel rolls, wrapping paper tubes, drinking straws, PVC pipes and connectors, etc.

We will also spend time working on our Valentine's Day theme. We will do a graphing activity with candy hearts and create unique love bugs with paint. Later this month, we will work on a dental health unit. We will learn about healthy habits for our teeth and do an experiment to show why brushing our teeth is so important.

We will be celebrating Valentine's Day in our classroom on Thursday, February 13. Students are welcome to bring valentines for their classmates and may also bring a treat, if you wish. Please adhere to the school treat policy - only individually wrapped and sealed items may be distributed. There are 15 students in our preschool class. Thank you for your cooperation!

We are looking forward to our field trip later this month to the Oak Lawn Children's Museum. Chaperones will be limited for this field trip. More information will be sent home soon.

Sincerely,

Mrs. Colleen Brychel
