

March

Please read to your child every night. Stop and ask questions as you read. Questions like what is happening? What do you think will happen next? What do you notice in the pictures?

Math:

This month we will be continuing on with our shape unit. Students will be able to identify 2-D and 3-D shapes. They will be able to describe attributes of each shape and relate them to real world objects.

Reading:

We will be starting our unit on friendship. We will be reading stories and completing activities to get the students engaged and talking about what it means to be a good friend. We will be talking about things they like to do with their friends and how we should treat our friends.

Please come to Reading Night on Thursday, March 11th. Our spotlight author is Lucille Colandro.

Phonics:

We will be continuing on with word families ug and ub.
